this book is about enforcing privacy and data protection it demonstrates different approaches regulatory legal and technological to

enforcing privacy if regulators do not enforce laws or regulations or codes or do not have the resources political support or wherewithal to enforce them they effectively eviscerate and make meaningless such laws or regulations or codes no matter how laudable or well intentioned in some cases however the mere existence of such laws or regulations combined with a credible threat to invoke them is sufficient for regulatory purposes but the threat has to be credible as some of the authors in this book make clear it is a theme that runs throughout this book carrots and soft law need to be backed up by sticks and hard law the authors of this book view privacy enforcement as an activity that goes beyond regulatory enforcement however in some sense enforcing privacy is a task that befalls to all of us privacy advocates and members of the public can play an important role in combatting the continuing intrusions upon privacy by governments intelligence agencies and big companies contributors to this book including regulators privacy advocates academics smes a member of the european parliament lawyers and a technology researcher share their views in the one and only book on enforcing privacy

over the last several years the realm of technology and privacy has been transformed creating a landscape that is both dangerous and encouraging significant changes include large increases in communications bandwidths the widespread adoption of computer networking and public key cryptography new digital media that support a wide range of social relationships a massive body of practical experience in the development and application of data protection laws and the rapid globalization of manufacturing culture and policy making the essays in this book provide a new conceptual framework for the analysis and debate of privacy policy and for the design and development of information systems

an insight into bank secrecy in major jurisdictions complemented by chapters on privacy data protection conflict of laws and exchange of information
