Timing Differences** One of the most frequent issues in bank reconciliation arises from timing differences between when transactions are recorded in the company's books and when they are reflected in the bank statement. For example, checks issued but not yet cashed or deposits made but not yet processed by the bank can cause discrepancies.

- 3. Outstanding Checks** Outstanding checks are checks issued by the company that have not yet cleared the bank. They can cause differences between the company's ledger and the bank statement until they are processed.
- 4. Bank Fees and Charges Not Recorded** Banks often deduct fees, charges, or interest directly from the account without the company's immediate knowledge. If these are not recorded properly, discrepancies will arise.
- 5. Unauthorized or Fraudulent Transactions** Unauthorized or fraudulent transactions can appear on bank statements, leading to potential losses and reconciliation issues if not promptly identified and addressed.
- 6. Data Entry and Transposition Errors** Transposition errors occur when digits are accidentally swapped during data entry, e.g., recording \$1,250 as \$12,50. These mistakes can distort account balances.
- 7. Bank Errors** Banks may also make errors, such as recording incorrect amounts or posting transactions to the wrong account, which complicates reconciliation.
