David was recognized as being in the top 3 per cent of the most prolific finance researchers in the world over the past 50 years. Heck and Cooley 2009 and appears regularly in the media as a business commentator.

Business valuation and company value play a very important role in making an informed investment decision. Buying and selling shares and bonds of a company on the stock market, insurance, taxation etc. This book develops new approaches to business valuation and company value. The existing methods of business and company valuation have many shortcomings, two of which are global, related to the impossibility of estimating one of the fundamental parameters of valuation, the discount rate, and the impossibility of correctly accounting for the retrospective period of valuation. Both of these shortcomings can currently be overcome only within the framework of the modern theory of Brusov, Filatova, Orekhova, BFO, which is done in this monograph devoted to the development of a qualitatively new approach to the valuation of businesses and companies. The second most important method of business valuation, CAPM, was generalized by the authors to include financial risk along with business risk and for the first time this was done correctly. A new model, CAPM 2.0, was created and applied to many companies and finally CAPM 2.0 was included in the modern theory of Brusov, Filatova, Orekhova, BFO, which allows for a correct assessment of a business and a company taking into account both business and financial risks, illustrating the practical application of the developed innovative approach.

In the wake of a fast changing economic landscape characterized by global financial crisis, volatile equity and bond markets, rising dominance of emerging markets and increasing investor activism, the role of financial managers in an organization has assumed significant importance.
