today's politicians, medical schools and doctors will resist the changes that are needed to put the patient's needs first again.

Good practice: what it means to put the patient first, not politics, posturing, pretentiousness, protocols or process. This is a text book for all doctors but especially GPs, appraisers and registrars. It is written by a 40-year plus front-line NHS doctor who for most of his career worked twice to three times the current doctors' working time directive limited week. Chris Heath has been a paediatric lecturer in a teaching hospital, an anaesthetist, various junior specialists and a GP for over 30 years in 3 different practices. He has been a GP trainer and appraiser and has seen politics and political correctness harm patients' interests constantly over the last half of his career. From the way the NHS selects young doctors to the way they are educated and assessed, the best interests of the patient are largely ignored. This is a text book but it also contains home truths, advice, insights and original, honest guidance on being a safe, effective doctor, as well as giving an assessment of what has gone wrong with the NHS over the last 20 years. The author explains why today's politicians, medical schools, royal colleges and many doctors will resist the changes essential to put the patient's needs first again.
