making use of deleuze in planning translates and re creates some of gilles
deleuze s most abstract philosophical concepts to form a new practicable
planning assessment tool it shows what his philosophy can do for planning
theory as well as planning assessment practice and in doing so sets out a
pragmatic approach to deleuzian studies one that helps form bridges between
ontological problems and the problems found in professional practice it also
breaks new ground in assessment methodology by challenging the essentialist
ideas underpinning assessment methods like breem and setting out and

testing a new form of non essentialist assessment named siam the book argues that deleuze s philosophy can be made useful to planning as long as one is prepared to adapt and re create his key ontological concepts to respond to the specific demands of the field

over a century after the death of queen victoria historians are busy re appraising her age and achievements however our understanding of the victorian era is itself a part of history shaped by changing political cultural and intellectual fashions bringing together a group of international scholars from the disciplines of history english literature art history and cultural studies this book identifies and assesses the principal influences on twentieth century attitudes towards the victorians developments in academia popular culture public history and the internet are covered in this important and stimulating collection and the final chapters anticipate future global trends in interpretations of the victorian era making an essential volume for students of victorian studies

this is the second part of a major theoretical work by patrik schumacher which outlines how the discipline of architecture should be understood as its own distinct system of communication autopoeisis comes from the greek and means literally self production it was first adopted in biology in the 1970s to describe the essential characteristics of life as a circular self organizing system and has since been transposed into a theory of social systems this new approach offers architecture an arsenal of general comparative concepts it allows architecture to be understood as a distinct discipline which can be analyzed in elaborate detail while at the same time offering insightful comparisons with other subject areas such as art science and political discourse on the basis of such comparisons the book insists on the necessity of disciplinary autonomy and argues for a sharp demarcation of design from both art and engineering schumacher accordingly argues controversially that design as a discipline has its own sui generis intelligence with its own internal logic reach and limitations whereas the first volume provides the theoretical groundwork for schumacher s ideas focusing on architecture as an autopoeitic system with its own theory history medium and its unique societal function the second volume addresses the specific contemporary challenges and tasks that architecture faces it formulates these tasks looking specifically at how architecture is seeking to organize and articulate the complexity of post fordist network society the volume explicitly addresses how current architecture can upgrade its design methodology in the face of an increasingly demanding task environment characterized by both complexity and novelty architecture s specific role within contemporary society is explained and its relationship to politics is clarified finally the new global style of parametricism is introduced

and theoretically grounded

this study reassesses modern architecture and town planning in mid twentieth century england highlighting ideas and debates that were in circulation as modernist ideals gradually took root the book reveals an architectural culture that was serious active and visionary with impact that extended into the postwar years through close studies of specific works and writings the author acknowledges the importance of the international context of modern architecture as it intersected with the variety of narratives that defined english modernism such as national identity the new empiricism and the picturesque taking into account the large community of émigré architects who settled in england with the approach of world war ii as well as a more general dissemination of international style forms and theories from continental europe the book places familiar figures such as berthold lubetkin and ernö goldfinger as well as projects such as tecton s penguin pool and the festival of britain s live architecture exhibition in new light presenting a rich picture of the modern architectural climate in england the study draws attention to the debates proposals and processes that fed into the development of modernist urban minded and forward looking architectural ideals
