now available in paper for the first time this volume brings together leading contributors to provide a comprehensive review of theory research and practice in child and adolescent personality assessment organized for easy reference the book is divided into four parts part i

summarizes basic theories issues and concepts setting forth a framework for assessment as a hypothesis generating problem solving process part ii describes and evaluates a wide range of relevant approaches tests and techniques marshaling the available data and reviewing administration procedures scoring and interpretation in part iii the process by which personality assessment is translated into effective intervention strategies and programs for children is examined in depth a summary of major perspectives and recommended practices is presented in part iv which also considers future needs and directions for the field

first published in 1983 routledge is an imprint of taylor francis an informa company

psychologists offer an increasing variety of services to the public among these services psychological assessment of personality and behavior continues to be a central activity one main reason is that other mental health professionals often do not possess a high level of competence in this area and when dealing with children and adolescents psychological assessment seems to take on an even greater role therefore it follows that comprehensive graduate level instruction in assessment should be a high priority for educators of psychologists who will work with these youth this textbook is organized into three sections consistent with the authors approach to teaching part i provides students with the psychological knowledge base necessary for modern assessment practice including historical perspectives measurement science child psychopathology ethical legal and cultural issues and the basics of beginning the assessment process part ii gives students a broad review of the specific assessment methods used by psychologists accompanied by specific advice regarding the usage and strengths and weaknesses of each method in part iii we help students perform some of the most sophisticated of assessment practices integrating and communicating assessment results and infusing assessment practice with knowledge of child development and psychopathology to assess some of the most common types of behavioral and emotional disorders in youth a text focusing on assessment practices must be updated every four to six years to keep pace with advances in test development for example several of the major tests reviewed in the text such as the behavioral assessment system for children and the child behavior checklist have undergone major revisions since the publication of the last edition making the current content outdated further another major test the conners rating scales is undergoing substantial revisions that should be completed before publication of the next edition finally the evidence for the validity of the tests and the recommendations for their appropriate use evolve as research accumulates and requires frequent updating to remain current for example there was a special issue of the journal of clinical child and adolescent psychology published focusing on evidenced based assessment of the major forms of childhood psychopathology that will need to be integrated into the chapters in part 3 this latter point reflects an important trend in the field that should influence the marketing of the book that is there are several initiatives being started in all of the major areas of applied

psychology e.g. school, clinical, and counseling to promote evidenced-based assessment practices. These initiatives have all emphasized the need to enhance the training of graduate students in this approach to assessment. This has been the orientation of this textbook from its first edition that is, clinical assessment of child and adolescent personality and behavior has focused on using research to guide all recommendations for practice. The ability of the textbook to meet this training need should be an important focus of marketing the book to training programs across all areas of applied psychology.

Designed to help students learn how to assess clients, conduct treatment planning, and evaluate client outcomes, *Counseling Assessment and Evaluation* addresses specific CACREP competencies, incorporating case studies and examples. Authors Joshua C. Watson and Brandé Flamez provide foundational knowledge for sound formal and informal assessments, cover ethical and legal considerations in assessment, describe basic statistical concepts, highlight the domains in which assessments are commonly used (intelligence, aptitude, achievement, personality, career, etc.) and provide strategies for integrating assessment data when working with clients. Watson and Flamez have captured the essence of the assessment process in their new book through rich case illustrations and the authors' deep knowledge of the subject. Readers are provided the most current trends and reflections on the assessment process. Bill Mchenry, Texas A M University, Texarkana, the text is very straightforward and easy to read; it encourages students to apply what they are learning through case illustrations and guided practice exercises. Wendy Killam, Stephen F. Austin State University, Watson and Flamez provide the reader with an engaging discussion of the fundamentals of counseling assessment and evaluation. Mark W. Dewalt, Winthrop University, the case illustrations and the practice exercises are exceptional and go a long way toward making the material accessible. Case examples in the body of the text are also well done. Patricia Andersen, Midwestern State University.

Emotionally charged issues abound in matrimonial practice, especially in custody disputes. Expert testimony can have a dramatic impact on the outcome of a case, and when matters are highly sensitive or sensational, the seeming objectivity of an expert can be dispositive to effectively reinforce or question that testimony. Certain specialized knowledge is essential. Scientifically accepted standards and theories are constantly evolving, keeping up with the data has been a challenge, but one integrated resource has made it simple. Aspen Publishers' *Psychological Experts in Divorce Actions* pulls all the research together into the definitive guide to understanding the role of psychological evaluations in divorce and custody actions, focused on providing the best approach to protecting your client's interests. This work explains all the leading testing instruments, what conclusions may be drawn, and how to challenge or support those conclusions. In addition to offering effective examination and cross-examination strategies, it assists you in handling the gamut of psychological factors that affect clients in divorce and custody cases.

authors marc j ackerman ph d and andrew w kane ph d are licensed psychologists who have been involved in hundreds of custody cases drawing on their extensive experience testing parties to a divorce and treating psychological patients in the clinic and as psychological experts in the courtroom they identify the most important psychological evaluation research used in divorce and custody decision making and distill the information into clear terms lawyers can readily apply they also examine vital issues including ethics confidentiality privilege duty to warn or protect tarasoff sharing raw data test integrity sexual abuse bona fide or fabricated allegations psychological effects of sexual abuse profiles of abuser and abused testing personality tests including mmpi 2 and the new mmpi 2 rf rorschach millon tat intelligence tests wechsler scales kaufman scales stanford binet custody tests aspect pcri pass bps and many more how divorce affects families custody placement age and gender differences grandparents sexual preference psychological problems
