this edited volume features a curated selection of research in algebraic combinatorics that explores the boundaries of current knowledge in the field focusing on topics experiencing broad interest and rapid growth invited contributors offer survey articles on representation theory symmetric functions invariant theory and the combinatorics of young tableaux the volume also addresses subjects at the intersection of algebra combinatorics and geometry including the study of polytopes lattice points hyperplane arrangements crystal graphs and grassmannians all surveys are written at an introductory level that emphasizes recent developments and open problems an interactive tutorial on schubert calculus emphasizes the geometric and topological aspects of the topic and is suitable for combinatorialists as well as geometrically minded researchers seeking to gain familiarity with relevant combinatorial tools featured authors include prominent women in the field known for their exceptional writing of deep mathematics in an accessible manner each article in this volume was reviewed independently by two referees the volume is suitable for graduate students and

researchers interested in algebraic combinatorics

this volume contains proceedings of two conferences held in toronto canada and kozhikode india in 2016 in honor of the 60th birthday of professor kumar murty the meetings were focused on several aspects of number theory the theory of automorphic forms and their associated l functions arithmetic geometry with special emphasis on algebraic cycles shimura varieties and explicit methods in the theory of abelian varieties the emerging applications of number theory in information technology kumar murty has been a substantial influence in these topics and the two conferences were aimed at honoring his many contributions to number theory arithmetic geometry and information technology

this book constitutes the refereed proceedings of the 15th conference on computability in europe cie 2019 held in durham uk in july 2019 the 20 revised full papers presented were carefully reviewed and selected from 35 submissions in addition this volume includes 7 invited papers the conference cie 2018 had the following six special sessions computational neuroscience history and philosophy of computing lowness notions in computability probabilistic programming and higher order computation smoothed and probabilistic analysis of algorithms and transitive computations

this encyclopaedia of mathematics aims to be a reference work for all parts of mathematics it is a translation with updates and editorial comments of the soviet mathematical encyclopaedia published by soviet encyclopaedia publishing house in five volumes in 1977 1985 the annotated translation consists of ten volumes including a special index volume there are three kinds of articles in this encyclopaedia first of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used the main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible on the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics these articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question they also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions the second kind of article of medium length contains more detailed concrete problems results and techniques

this series is devoted to the publication of monographs lecture resp seminar notes and other materials arising from programs of the osu mathematical research institute this includes proceedings of conferences or workshops held at the institute and other mathematical writings

the series is aimed specifically at publishing peer reviewed reviews and contributions presented at workshops and conferences each volume is associated with a particular conference symposium or workshop these events cover various topics within pure and applied mathematics and provide up to date coverage of new developments methods and applications

over 220 000 entries representing some 56 000 library of congress subject headings covers all disciplines of science and technology e g engineering agriculture and domestic arts also contains at least 5000 titles published before 1876 has many applications in libraries information centers and other organizations concerned with scientific and technological literature subject index contains main listing of entries each entry gives cataloging as prepared by the library of congress author
