European countries. Ellie Palmer's *Journal of International Banking Law and Regulation* discusses the eastward expansion of the European Union, one of the most explosive economic and political issues of the early 21st century. Economic and financial stability combined with rising prosperity in the applicant countries are increasingly seen as necessary preconditions for European Union membership. This authoritative volume, written by scholars and practitioners from central and western Europe and the United States, confronts the issues involved in three of the countries most likely to be successful applicants to the EU: the Czech Republic, Hungary, and Slovenia. A spotlight is turned on the banking and financial industries as they are crucial to the achievement of economic stability. The blend of expertise deployed, which draws on in-depth knowledge and extensive experience in central banking, financial and commercial law, business, practical policy making, and economic analysis, ensures that this book is timely, relevant, and insightful. The authors suggest that the role of the state in both creating and maintaining an effective financial sector is central. Furthermore, they argue that well-regulated commercial banks and strategic foreign investors are a must. As in practice, the attempt to skip straight to modern capital markets has been ruinous. This accessibly written volume will be of interest to students and scholars of economics, finance, law, political science, the sociology of economic life, and European studies.
