this book is an ambitious research work that incorporates recent findings on communication and knowledge in organizations and includes contributions from

global researchers it brings together researchers from various countries who are active in this field and describes research on communication and knowledge that considers the development of ict under the positivist paradigm part i as well as research on communication and knowledge that focuses on language under the interpretivist paradigm part ii by approaching research on communication and knowledge in organizations using these two paradigms this book presents a clear and energetic overview of the characteristics of both

communication is a basic behaviour found across animal species human language is often thought of as a unique system which separates humans from other animals this textbook serves as a guide to different types of communication and suggests that each is unique in its own way human verbal and nonverbal communication communication in nonhuman primates in dogs and in birds research questions and findings from different perspectives are summarized and integrated to show students similarities and differences in the rich diversity of communicative behaviours a core topic is how young individuals proceed from not being able to communicate to reaching a state of competent communicators and the role of adults in this developmental process evolutionary aspects are also taken into consideration and ideas about the evolution of human language are examined the cross disciplinary nature of the book makes it useful for courses in linguistics biology sociology and psychology but it is also valuable reading for anyone interested in understanding communicative behaviour

basic concepts in information theory and coding is an outgrowth of a one semester introductory course that has been taught at the university of southern california since the mid 1960s lecture notes from that course have evolved in response to student reaction new technological and theoretical developments and the insights of faculty members who have taught the course including the three of us in presenting this material we have made it accessible to a broad audience by limiting prerequisites to basic calculus and the elementary concepts of discrete probability theory to keep the material suitable for a one semester course we have limited its scope to discrete information theory and a general discussion of coding theory without detailed treatment of algorithms for encoding and decoding for various specific code classes readers will find that this book offers an unusually thorough treatment of noiseless self synchronizing codes as well as the advantage of problem sections that have been honed by reactions and interactions of several generations of bright students while

agent 00111 provides a context for the discussion of abstract concepts

this book describes ongoing developments in social media within the tourism and hospitality sector highlighting impacts on both the demand and the supply side it offers a combination of theory and practice with discussion of real life business experiences the book is divided into three parts the first of which provides an overview of recent trends in social media and user generated content clarifies concepts that are often used in an overlapping way and examines the digitization of word of mouth via online networks the second part analyzes the impacts that social media can have on traveler behavior for each step in the travel process and also on suppliers highlighting opportunities threats and strategies in the third part of the book future potential trends deriving from the mobile marketing technologies are explored and possible methods for social monitoring by means of key performance indicators are examined it is considered how engaging customers and prospects by means of social media might increase customer loyalty foster electronic word of mouth communication and consequently have important effects on corporate sales and revenues the discussion encompasses methods to measure company performance on each of the social media in order to understand the optimal mix that will support and improve business strategies

part of the sage social thinker series this book serves as a concise and inviting introduction to the life and works of erving goffman one of the most prominent social theorists in postwar sociology goffman s ideas continue to influence scholars in various fields and have also attracted many readers outside conventional academia goffman s overall research agenda was the exploration of what he termed the interaction order that is the micro social order that regulates the co mingling of people in each other s immediate presence he coined several new concepts face work impression management role distance civil inattention etc with which to grasp and understand the complexities and basic social restructuring of everyday life many of which are now part of sociology s standard vocabulary

information systems development isd progresses rapidly continually creating new challenges for the professionals involved new concepts approaches and techniques of systems development emerge constantly in this field progress in isd comes from research as well as from practice this conference will discuss issues pertaining to information systems development isd in the inter networked digital economy participants will include researchers both experienced and novice from industry and
