this book theorizes digital logics and applications for the rhetorical canon of delivery digital

writing technologies invite a re evaluation about what delivery can offer to rhetorical studies and writing practices sean morey argues that what delivery provides is access to the unspeakable unconscious elements of rhetoric not primarily through emotion or feeling as is usually offered by previous studies but affect a domain of sensation implicit in the overlooked original greek term for delivery hypokrisis moreover the primary means for delivering affect is both the logic and technology of a network construed as modern digital networks but also networks of associations between humans and nonhuman objects casting delivery in this light offers new rhetorical trajectories that promote its incorporation into digital networked bodies given its provocative and broad reframing of delivery this book provides original robust ways to understand rhetorical delivery not only through a lens of digital writing technologies but all historical means of enacting delivery offering implications that will ultimately affect how scholars of rhetoric will come to view not only the other canons of rhetoric but rhetoric as a whole

this study discusses the question of whether there is a linguistic difference between classical attic prose texts intended for public oral delivery and those intended for written circulation and private performance identifying such a difference which exclusively reflects these disparities in modes of reception has proven to be a difficult challenge for both literary scholars and cultural historians of the ancient world with answers not always satisfactory from a methodological and an analytical point of view the legitimacy of the question is first addressed through a definition of what such slippery notions as orality and oral performance mean in the context of classical athens reconstruction of the situations in which the extant prose texts were meant to be received and an explanation of the grounds on which we may expect linguistic features of the texts to be related to such situations the idea that texts conceived for public delivery needed to be as clear as possible is substantiated by available cultural historical and anthropological facts however these do not imply that the opposite was required of texts conceived for private reception in establishing a rigorous methodology for the reconstruction of the native perception of clarity in the original contexts of textual reception this study offers a novel approach to assessing orality in classical greek prose through examination of linguistic and grammatical features of style it builds upon the theoretical insights and current experimental findings of modern psycholinguistics providing scholars with a new key to the minds of ancient writers and audiences

thoroughly updated and revised the second edition of this successful and widely praised textbook offers an account of the classical period of greek history from the aftermath of the persian wars in 478 bc to the death of alexander the great in 323 bc two important new

the definitive book on judicial review in athens from the 5th through the 4th centuries bce the power of the court to overturn a law or decree called judicial review is a critical feature of modern democracies contemporary american judges for example determine what is consistent with the constitution though this practice is often criticized for giving unelected officials the power to strike down laws enacted by the people s representatives this principle was actually developed more than two thousand years ago in the ancient democracy at athens in control of the laws in the ancient democracy at athens edwin carawan reassesses the accumulated evidence to construct a new model of how athenians made law in the time of plato and aristotle while examining how the courts controlled that process athenian juries carawan explains were manned by many hundreds of ordinary citizens rather than a judicial elite nonetheless in the 1890s american apologists found vindication for judicial review in the ancient precedent they believed that athenian judges decided the fate of laws and decrees legalistically focusing on fundamental text because the speeches that survive from antiquity often involve close scrutiny of statutes attributed to lawgivers such as solon much as a modern appellate judge might resort to the wording of the framers carawan argues that inscriptions speeches and fragments of lost histories make clear that text based constitutionalism was not so compelling as the ethos of the community carawan explores how the judicial review process changed over time from the restoration of democracy down to its last decades the athenians made significant reforms in their method of legislation first to expedite a cumbersome process then to revive the more rigorous safeguards jury selection adapted accordingly the procedure was recast to better represent the polis and packing the court was thwarted by a complicated lottery but even as the system evolved the debate remained much the same laws and decrees were measured by a standard crafted in the image of the people offering a comprehensive account of the ancient origins of an important political institution through philological methods rhetorical analysis of ancient arguments and comparisons between models of judicial review in ancient greece and the modern united states control of the laws in the ancient democracy at athens is an innovative study of ancient greek law and democracy
