theory and practice of sociocriticism was first published in 1988 minnesota archive editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original university of minnesota press editions edmond cros is a leading french hispanicist whose work is unique in continental theory because it brings spanish and mexican texts into current literary debates which have so far centered mainly on the french and german traditions equally distinctive is the nature of his work which cros

terms sociocriticism unlike most sociological approaches to literature which leave the structure of texts untouched sociocriticism aims to prove that the encounter with ideological traces and with antagonistic tensions between social classes is central to any reading of texts *cross* method distinguishes between the semiotic and ideological elements within a text and involves the patient exacting reconstruction of the concrete text from these elements a process that enables the sociocritic to interpret its fault lines its internal contradictions in the end its irreducibly social nature as its title suggests theory and practice of sociocriticism is structured in two parts its opening chapters analyze sociological theories of discourse including those of Foucault Bakhtin and Goldman in the second part *cross* applies theory to practice in readings of specific works the film *Scarface* contemporary Mexican poetry and prose Octavio Paz Carlos Fuentes and the picaresque novel of the Spanish Golden Age in their foreword Jürgen Link and Ursula Link Heer differentiate sociocriticism from other social approaches to literature and show how *cross* method works in specific textual readings they emphasize his resistance to the reductive modes and misreadings that dominate much of contemporary theory Edmond *cross* is a professor of literary theory and hispanic studies at the universite paul valery in Montpellier France and Andrew W. Mellon professor of hispanic studies at the university of Pittsburgh Jürgen Link teaches at the Ruhr Universität Bochum and Ursula Link Heer at the universitat siegen both in West Germany

every chapter from the first edition has been updated and four new chapters on current issues such as connectivism and social software innovations have been added these essays blend scholarship and research with practical attention to the details of teaching and learning

in the years since the publication of the best selling first edition the incorporation of ideas and theories from the rapidly growing field of financial economics has precipitated considerable development of thinking in the actuarial profession modern actuarial theory and practice second edition integrates those changes and presents an up to date comprehensive overview of UK and international actuarial theory practice and modeling it describes all of the traditional areas of actuarial activity but in a manner that highlights the fundamental principles of actuarial theory and practice as well as their economic financial and statistical foundations

today's clinical social workers face a spectrum of social issues and problems of a scope and severity hardly imagined just a few years ago and an ever widening domain of responsibility to overcome them theory and practice in clinical social work is the authoritative handbook for social work clinicians and graduate social work students that keeps pace with rapid social changes and presents carefully devised methods models and techniques for responding to the needs of an increasingly diverse clientele following an overview of the principal frameworks for clinical practice including systems theory behavioral and cognitive theories psychoanalytic theory and neurobiological theory the book goes on to present the major social crises problems and new populations the social work clinician confronts each day theory and practice in clinical social work includes 29 original chapters many with carefully crafted and detailed clinical illustrations by leading social work scholars and master clinicians who represent the widest variety of clinical orientations and specializations collectively these leading authors have treated nearly every conceivable clinical population in virtually every practice context using a full array of treatment approaches and modalities included in this volume are chapters on practice with adults

and children clinical social work with adolescents family therapy and children s treatment groups other chapters focus on social work with communities affected by disasters and terrorism clinical case management cross cultural clinical practice psychopharmacology practice with older adults and mourning and loss the extraordinary breadth of coverage will make this book an essential source of information for students in advanced practice courses and practicing social workers alike

this book examines critical issues in the design of theoretically based and pedagogically sound distance education programs it integrates theory and pedagogy with practical issues related to practitioners administrators evaluators and policy analysts

this monograph covers both analytical and numerical aspects of the study of ordinary differential equations in combination with many practical models and examples chosen to illustrate the theoretical concepts emphasis is placed on initial value problems

the nobel prize winning father of modern portfolio theory returns with new insights on his classic work to help you build a lasting portfolio today contemporary investing as we know it would not exist without these two words portfolio selection though it may not seem revolutionary today the concept of examining and purchasing many diverse stocks creating a portfolio changed the face of finance when harry m markowitz devised the idea in 1952 in the past six decades markowitz has risen to international acclaim as the father of modern portfolio theory mpt with his evaluation of the impact of asset risk diversification and correlation in the risk return tradeoff in defending the idea that portfolio risk was essential to strategic asset growth he showed the world how to invest for the long run in the face of any economy in risk return analysis this groundbreaking four book series the legendary economist and nobel laureate returns to revisit his masterpiece theory discuss its developments and prove its vitality in the ever changing global economy volume 2 picks up where the first volume left off with markowitz s personal reflections and current strategies in this volume markowitz focuses on the relationship between single period choices now and longer run goals he discusses dynamic systems and models the asset allocation glide path inter generational investment needs and financial decision support systems written with both the academic and the practitioner in mind this richly illustrated volume provides investors economists and financial advisors with a refined look at mpt highlighting the rational decision making and probability beliefs that are essential to creating and maintaining a successful portfolio today
