this is the most authoritative account of life in medieval europe between the fall of the roman empire and the coming of the renaissance full coverage is given to all aspects of life in a thousand year period which saw the creation of western civilization from the empires and kingdoms of charlemagne the byzantines and the hundred years war to the ideals of the crusades the building of great cathedrals and the social catastrophe of the black death the cultural worlds of chivalric knights popular festivals and new art forms the chapters show the movement of the centre of gravity in european life from the mediterranean to the north and the authors explore the contrast between byzantine and renaissance cultures in the south and the new complex political and social structures of north west europe which by 1300 had the most advanced civilization the world had ever seen

introduction to medieval europe 300 1500 provides a comprehensive survey of this complex and varied formative period of european history within a global context covering themes as diverse as barbarian migrations the impact of christianisation the formation of nations and states the emergence of an expansionist commercial economy the growth of cities the crusades the effects of plague and the intellectual and cultural dynamism of the middle ages the book explores the driving forces behind the formation

of medieval society and the directions in which it developed and changed in doing this the authors cover a wide geographic expanse including western interactions with the byzantine empire the islamic world north africa and asia this fourth edition has been fully updated to reflect moves toward teaching the middle ages in a global context and contains a wealth of new features and topics that help to bring this fascinating era to life including west europe s catching up through intensive exchange with the mediterranean islamic world growth of autonomous cities and civic liberties emergence of an empirical and rational worldview climate change and intercontinental pandemics european exchange with africa and asia chapter introductions to support students understanding of the topics a fully updated glossary to give modern students the confidence and language to discuss medieval history clear and stimulating the fourth edition of introduction to medieval europe is the ideal companion to studying the entirety of medieval history at undergraduate level

excerpt from the history of medieval europe inasmuch as emigrants from all parts and from all races of europe have long since been coming to the united states and becoming american citizens it has seemed worth while to include the states and racial groups of central and eastern europe as well as the richer medieval history of those western european lands whose institutions and culture have thus far had the greatest influence upon our own in conformity with present tendencies in historical writing economic and social conditions are given due attention and many minor details of military and political history are omitted in these days of tottering thrones i have even ventured to lay the axe at the root of absolutism and to dispense with genealogical tables contemporary events sadly remind us that the age of wars is not past but they have also demonstrated that an intensive study of cæsar s commentaries and the tactics of hastings and crécy is of little use even to the modern military specialist while they have further reminded us that in the art of the past there are precious models and inspirations whose loss is almost irreparable since man is a reasoning and emotional being it is unfair to the past actors and uninteresting to the present readers of history merely to chronicle events without some indication of the ideas and ideals behind them as well as of the personalities that produced them but discussion of economic and intellectual influences should not be carried so far as to reduce the narrative of events in political history to a mere skeleton if wars and politics are to be discussed at all they should be treated with sufficient fullness to insure clearness and interest the background of physical geography is frequently referred to and described in the maps the aim has been to omit confusing detail and to keep them in close accord with the text as a rule all places mentioned in the text and no others are given in the accompanying maps about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

r c davis provided the classic account of the european medieval world equipping generations of undergraduate and a level students with sufficient grasp of the period to debate diverse historical perspectives and reputations his book has been important grounding for both modernists required to take a course in medieval history and those who seek to specialise in the medieval period in updating this classic work to a third edition the additional author now enables students to see history in action the diverse

viewpoints and important research that has been undertaken since Davis's second edition and progressed historical understanding each of Davis's original chapters now concludes with a new directions and developments section by Professor R. I. Moore, Emeritus of Newcastle University, a key work updated in a method that both enhances subject understanding and sets important research in its wider context, a vital resource now up to date for generations of historians to come.

This substantial volume is filled with over 140 maps and commentaries detailing the whole of the medieval period from the latter days of Rome through to the beginnings of the early modern world. Each map is designed to address particular themes and answers the needs of students of this period with supporting explanatory texts. The selection of maps takes a thorough and broad-ranging approach to the study of the Middle Ages. The maps chart a variety of areas including political events, military campaigns within Europe and in the Holy Lands, the power of the church and the rise of monasticism, literacy and the advent of printing, art and architecture. Others cover the financing of state and war, the principal trading leagues and trade routes, settlements and the increase in urbanism, the founding of the earliest universities, pogroms and persecutions and events at the frontiers of Christendom.

This volume provides a collection of imagined lives of individuals who, no matter their position on the social hierarchy, were crucial to the development of medieval Europe and the modern period that followed, based on primary source materials and the latest historical research. These literary accounts of otherwise unsourced or under-sourced individuals are written by leading scholars in the field. The book's approach transcends the limitations of both historical narrative and literary fiction, offering a research-informed presentation of real people that is enriched by informed speculation and creative storytelling. This enriched presentation of the lives of these individuals offers the quickest route to understanding medieval culture, society and intellectual thought. Crucially, the book treats the whole of Europe broadly defined, both conventional areas of study such as England and France and also lesser-studied but no less important areas such as Eastern Europe, Iberia and the Balkans. The reader of portraits of medieval Europe encounters the diversity present in the European past. The resulting portraits, unique, personal and engaging, offer not only a wide geographical scope but also perspective on the formation of European society in its fullest form. This book is accessible and engaging for students new to medieval history as well as those wishing to expand their knowledge of medieval society.

A spirited history of the changes that transformed Europe during the 1,000-year span of the Middle Ages, a dazzling race through a complex millennium. Publishers Weekly: The millennium between the breakup of the Western Roman Empire and the Reformation was a long and hugely transformative period, one not easily chronicled within the scope of a few hundred pages. Yet distinguished historian Chris Wickham has taken up the challenge in this landmark book, and he succeeds in producing the most riveting account of medieval Europe in a generation, tracking the entire sweep of the Middle Ages across Europe. Wickham focuses on important changes century by century, including such pivotal crises and moments as the fall of the Western Roman Empire, Charlemagne's reforms, the feudal revolution, the challenge of heresy, the destruction of the Byzantine Empire, the rebuilding of late medieval states, and the appalling devastation of the Black Death. He provides illuminating vignettes that underscore how shifting social, economic, and political circumstances affected individual lives and international events, and offers both a new conception of Europe's medieval period and a provocative revision of exactly how and why the Middle Ages matter. Far-ranging, fluent, and

thoughtful of considerable interest to students of history writ large and not just of europe kirkus reviews starred review includes maps and illustrations
