modern technology has changed the way we live work play communicate fight love and die yet few works have systematically explored these changes in light of their implications for individual and social welfare how can we conceptualize and evaluate the influence of technology on human well being bringing together scholars from a cross section of disciplines this volume combines an empirical investigation of technology and its social psychological and political effects and a philosophical analysis and evaluation of the implications of such effects

technology has extended its reach to the human body not just in a literal sense through implants transplants and technological substitutes for biological organs but in a more figurative sense too technological infrastructure and the institutions of a technified society today determine what perception is how we communicate and what forms of human relationship with the natural world are possible a fundamental new conception of technology is urgently needed technology can no longer be seen as a means for

efficiently attaining pre established ends rather it must be seen as a total structure which makes new forms of human action and human relationship possible while limiting the possibilities of others in invasive technification acclaimed german philosopher gernot böhme offers a reading of technology that explores the many dimensions in which technology presents challenges for modern human beings it is a book about the preservation of humanity and humane values under the demanding conditions of a technically advanced civilisation and makes a major contribution to the contemporary philosophy of technology
