this volume is the outcome of collaborative european research among archaeologists archaeobotanists ethnographers historians and agronomists and frequently uses experiments in archaeology it aims to establish new common ground for integrating

different approaches and for viewing agriculture from the standpoint of the human actors involved each chapter provides an interdisciplinary overview of the skills used and the social context of the pursuit of agriculture highlighting examples of tools technologies and processes from land clearance to cereal processing and food preparation this is the second of three volumes in the earth monograph series the dynamics of non industrial agriculture 8 000 years of resilience and innovation which shows the great variety of agricultural practices in human terms in their social political cultural and legal contexts

from about 5500 cal bc to soon after 5000 cal bc the lifeways of the first farmers of central europe the lbk culture linearbandkeramik are seen in distinctive practices of longhouse use settlement forms landscape choice subsistence material culture and mortuary rites within the five or more centuries of lbk existence a dynamic sequence of changes can be seen in for instance the expansion and increasing density of settlement progressive regionalisation in pottery decoration and at the end some signs of stress or even localised crisis although showing many features in common across its very broad distribution however the lbk phenomenon was not everywhere the same and there is a complicated mixture of uniformity and diversity this major study takes a strikingly large regional sample from northern hungary westwards along the danube to alsace in the upper rhine valley and addresses the question of the extent of diversity in the lifeways of developed and late lbk communities through a wide ranging study of diet lifetime mobility health and physical condition the presentation of the bodies of the deceased in mortuary ritual it uses an innovative combination of isotopic principally carbon nitrogen and strontium with some oxygen osteological and archaeological analysis to address difference and change across the lbk and to reflect on cultural change in general

although the need to study agriculture in different parts of the world on its own terms has long been recognized and re affirmed a tendency persists to evaluate agriculture

across the globe using concepts lines of evidence and methods derived from eurasian research however researchers working in different regions are becoming increasingly aware of fundamental differences in the nature of and methods employed to study agriculture and plant exploitation practices in the past contributions to this volume rethink agriculture whether in terms of existing regional chronologies in terms of techniques employed or in terms of the concepts that frame our interpretations this volume highlights new archaeological and ethnoarchaeological research on early agriculture in understudied non eurasian regions including island southeast asia and the pacific the americas and africa to present a more balanced view of the origins and development of agricultural practices around the globe
