this open access volume reveals the hidden power of the script we read in and how it shapes and drives our minds ways of thinking and cultures expanding on the linguistic relativity hypothesis i e the idea that language affects the way we think this volume proposes the

script relativity hypothesis i e the idea that the script in which we read affects the way we think by offering a unique perspective on the effect of script alphabets morphosyllabaries or multi scripts on our attention perception and problem solving once we become literate fundamental changes occur in our brain circuitry to accommodate the new demand for resources the powerful effects of literacy have been demonstrated by research on literate versus illiterate individuals as well as cross scriptal transfer indicating that literate brain networks function differently depending on the script being read this book identifies the locus of differences between the chinese japanese and koreans and between the east and the west as the neural underpinnings of literacy to support the script relativity hypothesis it reviews a vast corpus of empirical studies including anthropological accounts of human civilization social psychology cognitive psychology neuropsychology applied linguistics second language studies and cross cultural communication it also discusses the impact of reading from screens in the digital age as well as the impact of bi script or multi script use which is a growing trend around the globe as a result our minds ways of thinking and cultures are now growing closer together not farther apart

life scripts a transactional analysis of unconscious relational patterns is an exciting collection of contemporary writings on life script theory and psychotherapeutic methods each chapter describes an evolution of eric berne s original theory and brings together a stimulating range of international perspectives theoretical positions clinical experiences and psychotherapy practices as well as a psychotherapy story that illustrates the theory the concept of life scripts has frequently been associated with the determinism represented in theoretical scripts yet this book offers some new and diverse perspectives a few contributors address the significance of early childhood experiences in forming a life script while others reflect the perspectives of post modernism constructivism existential philosophy neuroscience developmental research mythology and the importance of narrative an illustrious group of authors has integrated a broad professional perspective into their understanding of a theory of mind theories of personality and the methods of psychotherapy each chapter provides a unique theoretical perspective some are provocative and challenge berne s and others long held notions about life scripts
