European Patent Office, the European Schools, Eurocontrol, OPEC, and Interpol, building extensively on the case law of domestic courts. The chapters highlight reoccurring legal issues in light of four working hypotheses. These relate to the nature of judicial review of the acts of international organizations, its interdependence with domestic methods of incorporating international law, the conditions of a human rights based review, and the tension between the independent functioning of an organization and guaranteeing legal protection against its acts. This approach ensures consistency among the book's chapters, which each focus on a different organization. Its conclusion brings the different findings together and analyses them in the light of the working hypotheses. It also discusses whether attempts to secure a certain minimum level of legal protection against acts of international organizations through judicial review by national courts may contribute to securing greater accountability of international organizations.

This timely and much needed handbook reconsiders an old topic from a fresh perspective, raising a number of new, interesting, and worthwhile issues. In the wake of ten years of globalization, this comprehensive analysis illustrates that old style industrial policies, whereby the government directly intervened in markets and was often the producer itself, are no longer relevant. Structural changes occurring in economies, summarized in the term globalization, are triggering the definition and implementation of new industrial policies. The contributors, leading experts in their field, unite to evaluate this shift of over a decade ago, employing various empirical and methodological approaches with a strong theoretical underpinning. This world wide study of the state of the art of industrial policy issues is an invaluable reference tool. It has been enthusiastically received by a wide ranging audience, including scholars, researchers, and policy makers with an interest in industrial economics and policy, business studies, and policies for growth, competitiveness, and development.
